

Abhinav Sharma

Phone: 7018601617 | Email: abhi.sh1402@gmail.com | Location: Hamirpur, India

Objective

Motivated B.Tech CSE student at NIT Hamirpur with strong programming and problem-solving skills. Interested in AI/ML, software development, and applying data-driven solutions to real-world problems.

Education

B.Tech – Computer Science & Engineering, National Institute of Technology (NIT) Hamirpur (2023–2027)

Skills

Programming Languages: C, C++, Python, JavaScript

Web Technologies: HTML, CSS

Core Competencies: Data Structures & Algorithms (DSA), Problem Solving, Machine Learning Basics

Projects

1. StudySync – Frontend Web Project: Responsive web interface using HTML, CSS, and JavaScript with reusable UI components.
2. Customer Churn Analysis (Machine Learning Project): Performed data manipulation, visualization, and predictive analysis on telecom churn dataset to identify customer retention insights.
3. CNN Handwritten Digit Classification (MNIST): Built and trained CNN using TensorFlow/Keras for image classification with preprocessing and evaluation metrics.
4. Loan Default Prediction System (Machine Learning Project)

Tech: Python, Scikit-learn, XGBoost, Pandas

- Built an end-to-end machine learning pipeline to predict loan default risk using real-world financial data

- Performed data cleaning, preprocessing, and feature engineering using ColumnTransformer and Pipelines

- Identified and removed data leakage features, improving model reliability (accuracy adjusted from ~100% to 88.5%)

- Compared multiple models including Random Forest and XGBoost, selecting the best based on performance metrics

- Evaluated model using accuracy, precision, recall, and F1-score

Certifications

Completed 2 month AI & Machine Learning Course – Krutanic.

Extracurricular Activities

Cricket – Team player at school/college level

Kabaddi – Active participation in tournaments

Chess – Strategic thinking and problem-solving
